EDUCATION

Coding & Finnish Language Training Program

BearIT Oy

01/2022 - Present

Vocational Qualification in Information and Communications Technology

Business College Helsinki

01/2018 - 05/2019

EXPERIENCE

Full Stack Developer(Trainee)

BearIT Oy

12/2001 - Present

Achievements/Tasks

- The project name is Coach app. The functionality of coach app is coach can create assignment for players and players can mark the assignment completed. Coach can also create group and assign exercises for individual group.
- The required technologies are React, Redux, Material-ui, CDK with AWS Lambda, Cognito, Api Gateway and Dynamodb.
- I have done the backend authentication part using cdk with AWS cognito and google OAuth during this first sprint. And also give clear idea about how to amplify cognito in react including forget password page and password confirmation page functionality to other group members.
- I have completed my task including cloudformation for AWS lambda, RestApi, Dynamodb Table and building restfulApi for create exercises, get single and all exercises. Also I made the data structure for exercise.

Frontend Developer(Internship)

Business College Helsinki

02/2019 - 05/2019

Achievements/Tasks

- Front-end Development of Priima project. The project is to update new feature of their existing website. The technology we used are React and CSS.
- Defining and Developing new features with teams.
- My responsibility is to develop the home page, header and footer as well as co-operate other team members to run the functionality.

PROJECTS

Portfolio (04/2022 - Present)

- I am creating my portfolio website using CDK with cloudformation, AWS Lambda, Cognito Authentication, DynamoDB, RestApi, React, Redux and Material UI.
- <https://github.com/Sumon-fa/portfolio-serverless-backend>
- <https://github.com/Sumon-fa/portfolio-serverless-frontend>

PROJECTS

Food Order App

- Be able to make a cart with using multiple react component.
- Acquired the knowledge of react-hooks and context api.
- <https://github.com/Sumon-fa/react-food-order-app>
- Live Link - <https://react-http-e353e.firebaseio.com/>

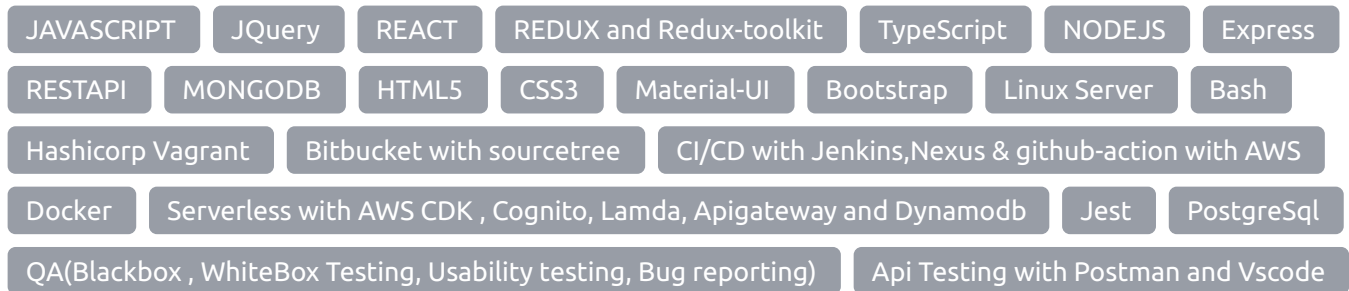

Redux Cart

- Learned the implementation Redux.
- <https://github.com/Sumon-fa/Redux-Cart>
- Live Link - <https://demo-redux-cart.netlify.app/>

BigShop- A full E-commerce site

- The project has been built by using React, Redux-toolkit, Express and MongoDB. It has both admin and customer interfaces where one can place order and admin can update, delete and add new products.
- Specifically, I have done the front-end part by using Redux-toolkit, both axios and fetch for http request and also I have used react helmet for showing title in the browser, react-pagination etc.
- For backend part, I have followed the udemy course using NodeJs .
- <https://github.com/Sumon-fa/Bigshop-ECommerce>.
